

NSCC CLUB CAR 2008

The NSCC are proud to announce the 2008 NSCC club car

The 12th car for exclusive sale to Club members will be supplied by SCX. Subject to final confirmation from Tecnitoys the details are as follows:

NSCC Skoda Fabia "Red Bull"
SCX Ref 63490
Wales Rally GB 2006
Harri Rovanpera/Risto Pietilainen
Race number 11
"Mud Effect"

This car will be a limited production run of only 500

This model of the Skoda Fabia is to be produced in three versions: 63280 "Skoda", Carlos Sainz, Spanish Championship (3000), 63450 "Red Bull" (1500) and 63490 NSCC Club car - as 63450 but differentiated by the mud effect and having "NSCC" on the windscreen (where the SCX logo used to be).

SCX rarely make special editions; this is only the second ever for the UK (after the SCX London Toy Fair Ford Focus). We have worked very closely with the UK distributor, AEC models to bring you this car and without Steve Wright's help and persistence this project would not have happened.

With its iconic Red Bull livery in blue, red and yellow the car will look stunning. For those of you who wish to use your limited edition car, the model will feature 4-wheel drive, lights and the other standard SCX rally car features.

Prices and delivery are still to be finalised but we expect delivery around September 2008. These cars are only available to current (at time of order) NSCC members. An order form will be printed in (or with) next month's Journal for you to complete. As we get more detailed photos of the actual model we will print them. In the meantime here is the real car.

*Gareth Jex,
SCX Factory liaison.*
